EVOSEP STRENGTHENS NORTH AMERICAN LEADERSHIP

Making clinical proteomics 100x more robust and 10x faster

(Odense, January 29, 2024) – Evosep, a leading provider of sample preparation and separations solutions for mass spectrometry-based proteomics, proudly announces the appointment of Rick Carberry as the Vice President of the Americas.

Rick Carberry has extensive commercial and marketing leadership experience in the Liquid Chromatography-Mass Spectrometry (LCMS) tools business. Before joining Evosep, he has held positions at Waters, SCIEX, Agilent, and Thermo Fisher. His exceptional track record in driving commercialisation success and expanding business operations across both well-established analytical instrument companies and innovative start-up ventures is a perfect match with Evosep's mission.

Commenting on his new role, Rick Carberry says: "I am thrilled to take on the VP of Americas role and join the talented team at Evosep. The company has innovated groundbreaking sample prep and separation solutions for proteomics with impressive adoption in the market. Building on and expanding our world-class service, support, marketing, and sales teams will be key to delivering growth as we expand in clinical diagnostics, drug development, and precision medicine."

Morten Bern, CEO of Evosep, express his enthusiasm for Rick's arrival: "Rick has a history of successfully driving growth within the field of proteomics. He is passionate about making a positive impact and has earned a reputation as an exceptional leader. These qualities are highly valued at Evosep, and we are excited to welcome Rick on board as we advance proteomics tools to make an impact in drug discovery and translational medicine."

Rick's appointment to VP Americas, marks a significant chapter in Evosep's journey, highlighting its dedication to innovation and partnership with customers in North America.

###

About Evosep

Evosep aims to improve quality of life and patient care by radically innovating protein based clinical diagnostics, initially through collaborations with world-leading scientists about developing new technologies and solutions to make sample separation 100 times more robust and 10 times faster than today's alternatives.

Information about Evosep is available at www.evosep.com.

The Evosep One instrument is for Research Use Only (RUO).
