

ELEVATE YOUR DECISIONS

INTEGRATE PLASMA PROTEOMICS EFFORTLESSLY WITH EVOSEP BIOLABS

No upfront investments

Partnering with Evosep Biolabs extends your operation by leveraging our cutting-edge plasma proteomics pipeline for immediate, actionable insights while maintaining the highest standards of scientific accuracy and data quality.

Our cost-efficient and reliable solutions reduce the complexity and overhead of internal setup, allowing you to focus on your research while ultimately benefiting from faster turn-around times, reduced costs, and greater flexibility.

Complete coverage

Evosep Biolabs provides comprehensive workflows featuring automated sample preparation and standardized separation methods. We ensure the delivery of high-quality proteomics data without the need for extensive in-house setup.

Our best-in-class instruments are operated by expert staff and enable rapid and reproducible plasma proteomics analyses,

Plasma proteomics provide

Invaluable insights into biological systems, enabling the unbiased discovery of disease mechanisms, novel biomarkers, new drug candidates, and the development of personalized therapies.

These capabilities make it a powerful tool for advancing medical research and improving patient outcomes.

Seamless scalability

Evosep Biolabs offers scalability from pilot studies over large cohorts to running production setups.

We also consult on and facilitate the transfer of workflows to external CROs or support you in establishing plasma proteomics capabilities within your organization.

Evosep Biolabs scales with your needs.

Reduce risk with
unbiased proteomics
data

Ensure data quality
and accuracy with
automation

Accelerate your
proteomics journey
with expert solutions

Add cost-efficient
capacity to your
discovery efforts

Tailored workflows

Comprehensive workflow

As a Biolabs customer, you gain seamless access to our advanced high-throughput plasma proteomics platform with deep characterization including proteoforms and PTMs.

Complete data ownership & flexibility

You retain full ownership of your data and can choose from a variety of analytical platforms tailored to your sample needs.

Efficient non-targeted analysis

Our streamlined, non-targeted pipeline delivers high-quality results with speed and precision, ensuring high-throughput data generation.

Expert collaboration & quality control

Your data undergoes stringent quality checks, and our team of specialists will work closely with you to maximize the value and insights gained from your research

Our mission

Evosep Biolabs aims to lower the barrier of adoption for scalable, automated LC-MS-based plasma proteomics by offering analytical capabilities and insourcing services for immediate use by clients and service providers.
